flask_service.yaml

```yaml
apiVersion:
v1
            kind: Service
            metadata:
              name: flask-app-service
            spec:
              type: ClusterIP
              ports:
                - port: 5000
              selector:
                app: flask-app
```
